PROFILE

Computer Science Engineering student with a solid foundation in programming, data structures, and algorithmic problem-solving. Proficient in Java and C++, with hands-on experience in developing innovative projects. Actively seeking a Software Engineering Internship to apply technical skills, contribute to real-world projects, and grow through collaborative problem-solving in a professional environment.

EDUCATION

BE-Computer Science and Engineering 08/2023 – Present
Coimbatore Institute of Technology, Coimbatore-641014
CGPA-8.86

Higher Secondar Education-II 03/2021 – 03/2023
New Power Matriculation & Higher Secondary School, Kallakurichi.
Score : 97%

SKILLS

Languages — Java, C++, Python, SQL, JS, HTML, CSS.

Frameworks & Tools — Django, GIT, Android Studio, React-JS, MongoDB.

Technical Skills — DSA, OOPS, DBMS, OS, CN, ML, DBMS.

Soft Skills — Team Management, Leadership, Time management, Communication skills.

PROJECTS

Smart Proctoring System (Computer Vision Application)

"An IOT & CV-based project for Offline Exam Cheating Detection System"

Technologies : **Python, OpenCV, YOLO-Pose, Machine Learning Deep Learning.**

- Designed an **AI-based proctoring solution** to analyze classroom CCTV footage and automatically identify potential exam misconduct.
- Applied **multi-person pose estimation** and **posture-based behavioral analysis** to differentiate legitimate exam actions from suspicious movements and check for **unauthorized gadgets** inside the exam hall.
- Enabled automated incident logging by **capturing visual evidence** with timestamps to support **effective invigilator intervention**.

Bus Rental Management System(MERN-APP)

"Full-stack platform to manage bus rentals with role-based access."

Technologies: **MongoDB, React.js, JWT, CSS.**

- Built a web app where users filter buses (capacity, price/km, features, route) and book trips with auto fare computation.
- Implemented JWT auth with User/Admin/Driver roles and protected routes across frontend and backend.
- Developed an admin panel for managing buses, drivers, assignments, bookings, and feedback in MongoDB.
- Created a driver portal to view assigned buses and update availability, with a responsive, card-based UI.

Ethereum Fraud Detection (Web Application)

"A web-based tool to detect suspicious Ethereum transactions using machine learning and blockchain API integration."

Technologies : **Django, Python, HTML, CSS, JS, Machine Learning.**

- Developed** a **fraud detection system** using a **Random Forest model** trained on labeled **Ethereum transaction data**.
- Integrated** the **Etherscan API** to fetch **real-time wallet transaction data** and **predict fraudulent behavior** through a **Django-based web interface**.
- Designed** a clean, **user-friendly GUI** with dynamic **transaction visualizations**, and applied **Google Dorking techniques** to trace **suspicious wallets** across public platforms.

PROFESSIONAL EXPERIENCE

Intern 06/2025 – 07/2025

Centre for Development of Advanced Computing (C-DAC) 

Learned the Basics of CyberSecurity And build an Application called Audio Forensics App.

Audio Forensics Voice Matching (Web Application)

"Web-based forensic tool for speaker verification using audio signal processing and machine learning".

ACHIEVEMENTS

Technical

- Solved 1200+ problems across Leetcode,GFG,CodeForces,CodeChef platforms.
- Got Knight badge at LeetCode.
- LeetCode Contest Rating : 1878, CodeForces : 1171,CodeChef : 1435 , GFG Score : 1161.
- Completed GFG 160 days DSA challenge.
- Hackathon : Cyberthon 2025-Finalist.

Non-Technical

- Volunteered in organizing the National level Symposium named Cryptera 2026 and Leded and Guided an Technical Event named OXDebug.
- Secured 97th rank as team in National Entrepreneurship Challenge organized by E-Cell,IIT-Bombay.
