EDUCATION

Coimbatore Institute of Technology

Bachelor of Engineering in Computer Science, GPA 8.59

Coimbatore, India

Sep. 2023 – Present

SCHOLARSHIP

Bertelsmann Next Gen Tech Booster Program

Scholarship on Generative AI Nanodegree by Udacity and Bertelsmann SE and Co.

Online Udacity

Dec. 2024 – Jun. 2025

CERTIFICATIONS

- **Coursera:** Amazon Junior Software Developer Professional [Link](#)
- **Microsoft:** Azure Fundamentals (AZ 900) Certification Exam [Link](#)
- **Microsoft:** Azure AI Fundamentals (AI 900) Certification Exam [Link](#)
- **Oracle:** Oracle Data Platform 2025 Certified Foundations Associate [Link](#)
- **Oracle:** OCI 2025 Certified AI Foundations Associate [Link](#)
- **Oracle:** Oracle Cloud Infrastructure 2025 Certified Foundations Associate [Link](#)

INTERNSHIP

Tamil Nadu Agricultural University (TNAU)

Intern – Web Development

Coimbatore, India [Link](#)

Dec. 2024 – Feb. 2025

- **Real-Time Weather Based Disease Prediction:** Designed a web interface for a predictive model that assists in agricultural diagnostics, focusing on the plant disease detection using real-time weather data.

PROJECTS

Rice Disease Prediction System

[GitHub](#)

- Built ML powered web platform to predict rice blast and false smut outbreaks using real-time weather data from OpenWeather API and historical datasets sourced from TNAU.
- Designed and trained a feed-forward Artificial Neural Network (ANN) in R with end-to-end data preprocessing, feature engineering, and three-tier risk classification (Low / Medium / High).
- Designed and deployed a REST API using R Plumber on Zoho Catalyst to serve ANN-based real-time predictions, achieving 2 to 3 second response latency.

Clockyn : A Deadline Management System

[GitHub](#)

- Engineered a full stack task management application using the MERN stack (MongoDB, Express.js, React.js, Node.js) with JWT based authentication, protected routes, and persistent session management.
- Implemented a feature rich task engine supporting one time, daily, weekly, and custom interval recurring deadlines with CRUD operations, priority based sorting, multi filter search, and real time status updates.
- Crafted a responsive glassmorphism dashboard using Tailwind CSS with live progress analytics, completion rate widgets, priority breakdowns, and overdue/upcoming deadline visualizations across all devices.

LightWeight FineTuning to Foundation-Model

[GitHub](#)

- Implemented LoRA-based parameter-efficient fine-tuning with AutoPeftModelForSequenceClassification.
- Implemented a CNN in TensorFlow/Keras with end-to-end preprocessing, training, and evaluation.
- Achieved significant speed-ups and memory savings, enabling large-model deployment on low-spec hardware.

SKILLS

Languages: C/C++, Java, Python, Oracle SQL, HTML, CSS, Javascript

Tools: Git, VS Code, Jupyter Notebook, Github, Zoho Catalyst, Azure services, Figma, Linux, MongoDB

Soft Skills: Leadership, Team Collaboration, Critical Thinking, Stress Management, Problem Solving

Communication: English, Tamil, Kannada

ACHIEVEMENTS

- ICPC 2025 Asia West Amritapuri MultiSite Regionalist (Onsite Rank: 172)
- Codeforces Specialist (Max. Rating: 1499)
- Leetcode Knight (Max. Rating: 2052)
- 3* on Codechef (Max. Rating: 1645)
- Solved 350+ on GeeksforGeeks (Coding Score: 1253)
